

Bibleref Tools

Tools for using bibleref will be posted here as they become available. See [the community page](#) for a list of contributions that are needed.

Table of contents

1 Blogging.....	2
2 Page Processors.....	2

1. Blogging

- Chris Roberts has incorporated bibleref into his [WordPress ESV Plugin](#), as of version 3.1.0.
- [The Holy Scripturizer 1.7](#) is a WordPress plugin that supports bibleref.

2. Page Processors

- Chris Roberts has developed [a bibleref test page](#) that you can use to check your markup and ensure references are recognized and output correctly. While Chris' processor isn't in 100% agreement with the current draft specification, most typical markup (except for a elements with the bibleref class attribute) should be recognized correctly.
